### **SPECIFICATIONS AND SPECIAL INSTRUCTIONS**

#### **PARKING LOT CONTROL EQUIPMENT**

**1. SCOPE OF WORK**

The objective of this public solicitation is to engage a professional firm with a minimum of 5 years' experience in the supply and installation of parking, access, and revenue control systems (PARCS) to furnish and install a complete parking lot control system for Lot 10 and Lot 11.

Lot 10 and Lot 11 parking lot control systems accommodate monthly parkers with the utilization of proximity cards and allow for the addition of transient parkers with a pay-in-lane automated pay station in the exit lane. The PARCS contractor is responsible for connecting the lane equipment to the power supply lines and control lines. The entrance and exit lanes on each lot will be connected to a facility or differential counter so FULL Signs can be automatically activated by the system. The intent of this specification is for the contractor to be able to eventually install a complete parking, access, and revenue control system.

**2. SUBMITTALS**

Manufacturer's literature, specification sheet, and other necessary information shall be submitted with the bid to show that the proposed parking lot control system meet the minimum requirements as described in this specification.

**3. ON SITE INSTALLATION**

Install a complete parking lot control system including; Lot 10 consists of one entrance lane and one exit lane. The entrance lane will each consist of; a FULL Sign and pedestal, a Magnetic Automation Card Reader Direct Drive barrier gate that will automatically raise when a vehicle displays a proximity card and approaches the gate arm. The installed system must be able to be adapted to an automatic entry system that will raise the gate when a vehicle approaches. When a vehicle enters the parking lot the differential counter will count the vehicle in the lot and reduce the automatic count by one space. The exit lanes will each consist of; a Magnetic Automation Card Reader Direct Drive barrier gate that will raise when a valid monthly card is used and eventually, when a payment machine is installed, to allow for transient parkers. This would mean A Pay-In-Lane automated pay station with a network interface board to connect the card readers and controllers into the existing access control system.

Lot 11 has the same requirement of Lot 10. One entrance lane and one exit lane. The entrance lane will each consist of; a FULL Sign and pedestal, a Magnetic Automation Card Reader Direct Drive barrier gate that will automatically raise when a vehicle displays a proximity card and approaches the gate arm. The installed system must be able to be adapted to an automatic entry system that will raise the gate when a vehicle approaches. When a vehicle enters the parking lot the differential counter will count the vehicle in the lot and reduce the automatic count by one space. The exit lanes will each consist of; a Magnetic Automation Card Reader Direct Drive barrier gate that will raise when a valid monthly card is used and eventually, when a payment machine is installed, to allow for transient parkers. This would mean A Pay-In-Lane automated pay station with a network interface board to connect the card readers and controllers into the existing access control system.

Installation shall include mounting, wiring AC power and control lines, connecting surge suppressors, installing control panel, setting up, programming system parameters as necessary, and testing complete system. Installation shall also include cutting pavement and installing eight (8) vehicle detection loops.

Interconnecting conduits for 120 VAC power and control cable will be provided by the electrical contractor. Except with respect to affectional or sexual orientation and gender identity or expression, the contractor will take affirmative action to ensure that such applicants are recruited and employed, and that employees are treated during employment, without regard to their age, race, creed, color, national origin, ancestry, marital status, affectional or sexual orientation, gender identity or expression, disability, nationality or sex. The contractor or subcontractor, where applicable, will send to each labor union or representative or workers with which it has a collective bargaining agreement or other contract or understanding, a notice, to be provided by the agency contracting officer advising the labor union or workers' representative of the contractor's commitments under this act and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

The contractor or subcontractor, where applicable, agrees to comply with any regulations promulgated by the Treasurer pursuant to N.J.S.A. 10:5-31 et seq., as amended and supplemented from time to time and the Americans with Disabilities Act.

The contractor or subcontractor agrees to revise any of its testing procedures, if necessary, to assure that all personnel testing conforms with the principles of job-related testing, as established by the statutes and court decisions of the State of New Jersey and as established by applicable Federal law and applicable Federal court decisions.

In conforming with the applicable employment goals, the contractor or subcontractor agrees to review all procedures relating to transfer, upgrading, downgrading and layoff to ensure that all such actions are taken without regard to age, creed, color, national origin, ancestry, marital status, affectional or sexual orientation, gender identity or expression, disability, nationality or sex, consistent with the statutes and court decisions of the State of New Jersey, and applicable Federal law and applicable Federal court decisions.
